

15. Résous les opérations en complétant les flèches.

$$583 + 357 =$$

A number line starting at 583. Three curved arrows point to the right, labeled with the steps: +300, +50, and +7. The intermediate numbers are 883, 933, and the final result 940.

$$952 - 574 =$$

A number line starting at 952. Three curved arrows point to the left, labeled with the steps: -500, -70, and -4. The intermediate numbers are 452, 382, and the final result 378.

$$366 + 295 =$$

A number line starting at 366. Three curved arrows point to the right, labeled with the steps: +200, +90, and +5. The intermediate numbers are 566, 656, and the final result 661.

$$334 - 196 =$$

A number line starting at 334. Three curved arrows point to the left, labeled with the steps: -100, -90, and -6. The intermediate numbers are 234, 144, and the final result 138.

$$673 + 158 =$$

A number line starting at 673. Three curved arrows point to the right, labeled with the steps: +100, +50, and +8. The intermediate numbers are 773, 823, and the final result 831.

$$842 - 578 =$$

A number line starting at 842. Three curved arrows point to the left, labeled with the steps: -500, -70, and -8. The intermediate numbers are 342, 272, and the final result 264.

$$445 + 497 =$$

A number line starting at 445. Three curved arrows point to the right, labeled with the steps: +400, +90, and +7. The intermediate numbers are 845, 935, and the final result 942.

$$552 - 379 =$$

A number line starting at 552. Three curved arrows point to the left, labeled with the steps: -300, -70, and -9. The intermediate numbers are 252, 182, and the final result 173.
